DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:

On page 8, line 18, "cylindrical lens 23" should be replaced with - - cylindrical lens 75 - -.

On page 9, line 26, "chamber 45" should be replaced with - - chamber 43 - -.

On page 13, line 4, "illuminated" should be replaced with - - illuminate - -.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 3 and 12 – 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claim 3 recites the limitation "the stationary mirror" in line 3. There is insufficient antecedent basis for this limitation in the claim. It is unclear if a stationary mirror is a required element of the claimed system.

5. In claim 12, it is unclear if the illuminating step is in addition to the illuminating step recited in claim 11, or if it is instead of the previously recited illuminating step (in which case claim 12 would fail to further limit its parent claim).

6. In claim 13, it is unclear if "the illuminating step" refers to the illuminating step of claim 11 or the illuminating step of claim 12.

Double Patenting

7. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

8. Claims 1 – 10 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1 – 10 respectively of prior U.S. Patent No. 6,630,063. This is a double patenting rejection. Instant claims 1 – 10 have the same scope as claims 1 – 10 respectively of US 6,706,163. Neither set of claims can reasonably be infringed without infringing the other.

9. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory

Art Unit: 1753

double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

10. Claims 11 – 16 are rejected on the ground of nonstatutory obviousness-type

double patenting as being unpatentable over claims 11 – 16 respectively of U.S. Patent

No. 6,630,063. Although the conflicting claims are not identical, they are not patentably

distinct from each other because claims 11 – 16 of U.S. Patent No. 6,630,063 include all

the limitations of the corresponding instant claims 11 – 16.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ananzawa et al. (US 5,833,827), Tanaka (US 6,319,705) and Li (US 6,759,662) each disclose a system and method comprising a plurality of capillaries with a light source and lens configured to simultaneously detect light from the capillaries.
